Spot Repair Case Everything you need for a professional repair on site

With the Spot Repair Case from Monopol Colors you can eliminate ugly scratches and seams on the metallic façade quickly, simply, and economically. **Because there is everything you need for a professional repair job!** You will find the video with instructions on our YouTube channel.

Cleaners and Paints

Protopol F60 Spray	Smoothing out unevenness
Qualiprotect Abrasive Cleaner B	Basic cleaning of surface
Vernidur FP Smoothener Spray	Smoothing out transitions in edge zones

Accessories

Adhesive tape	Fixing masking paper
Masking paper	Protecting intact surfaces
Sandpaper and sanding block	Pre-sanding scratches and unevenness
Spray nozzles (Flexjet & conventional)	Equipping spray
Stanley knife	Cutting masking paper to size
Tack cloth	Removing dust after sanding

Protection

Cleaning cloths	Removing dirt
Gloves	Protecting hands
Hand cream	Protecting skin and removing dirt
Protective clothing with mask	Protecting clothes and airways
Protective goggles	Protecting eyes

***Important: Your top coat is not included with the equipment in the standard repair case.** It is best if, when ordering the paint, you tell us how many repair spray cans are needed. The spray cans are then filled when the paint is prepared for your order and can be added to the Spot Repair Case. If a top coat is not ordered, the contents have to be mixed in a separate operation resulting in considerable extra cost.

Handy trolley case for easy transport

Case can be taken apart (three separate parts)

Spray nozzles: conventional or Flexjet

How-to Video on YouTube

On our YouTube channel, sales specialist Daniel Wehrli gives you step-by-step instructions on how to repair a surface using the Spot Repair Case.
