- Brush and roller application
- Fluoropolymer paint
- 10-year guarantee

New protection
and brightness
for 20 years

Before
 Faded, chalked façade

After
 New shine and protection for 20 years

Façade Renovation Gelsenwasser AG

Once, Gelsenwasser was a small regional organization. Today, 125 years after it was founded, Gelsenwasser is one of the largest suppliers of drinking water in Germany – a company with international operations in water, sewage, and energy.

The façade of the head office in Gelsenkirchen was faded and chalked, so «Qualiprotec» façade renovation from Monopol Colors was called for: pre-treatment + application + fluoropolymer paint + 10-year guarantee.

Pre-treatment: façade surfaces were rinsed with water, cleaned with Qualiprotec Cleaner N and façade pad, rinsed again with water, surfaces sanded and rinsed again. Renovation: roller application, since spraying would have been too time-consuming.

Principals Gelsenwasser AG, Gelsenkirchen

Façade steel base

Area 1600 m²

Products Qualiprotec Re-Vitaliser Q11 (RAL 5017) and Qualiprotec Re-Vitaliser Q15 (clear)

Application partner Graafmann Painters & Decorators, Bottrop-Kirchhellen
